

## BANNER CARE

1. If banner was displayed outside, clean banner before storing it. If you don't do this, the dirt/elements will stain. You need to clean it especially if you are going to change the dates/times for next year, there will be a "white shadow" where the old letters were, making the banner not look as good.
2. If you want to change the date/time/etc. for next time, take those letter/numbers off **before** you store it. The longer the vinyl letters stay on the banner, the more adhesives will stick to the banner. It will make it look nicer and be easier for your sign company to add the new information for next time.
3. Wrap banner around a big tube (4" diameter), vinyl facing outward. (If you wrap with the vinyl facing inward, the vinyl will wrinkle and not look good next time you use it.)

If you have any questions about care/storage, please give us a call or email!
